MARCARES is an industry leader in the rapidly growing field of identity theft prevention.

After dedicating almost two decades of designing physical security solutions and over a decade of performing credit restorations, we have gained a broad knowledge of the consumer's vulnerability to identity theft.

Defending yourself from identity theft has become a critical technical specialty everyone with assets needs. I have developed a powerful credit security system to virtually eliminate this risk by identifying the barriers that you must put in place to get the necessary protection.

Our system will lock the "doors and windows" to your identity, thus preventing negative identity events and giving you the peace of mind you need and deserve.

Most people (with the time and experience to do so) could follow our plan. Our experience is that you won't. It's MARCARES' responsibility to make sure these precautions are completed and any credit issues are identified and quickly resolved.
